1. In reference to paragraph 3 above, a review of the contract files and consultation with the Project Engineer currently assigned to Task Orders 5 and 6 under Contract 2267 was accomplished. This review revealed nothing which pertained to the disposition of non-expendable equipment purchased or furnished under T.O.#3. It is presumed however that the non-expendables under TO #3 were incorporated in the then existant TO #2. This presumption is further borne out by an inspection report in the contract file dated 28 February 1962 which states that the breadboard fabricated under TO #3 was made up of equipment from the Image Correlator, TO #2. Since TO #5 is a follow-on to TO #2, and is a deliverable item, the contractor's statement in paragraph 3 of his 21 May 1963 letter appears to be valid in that the expendable items were utilized in another unit under Contract [] STAT
